

Miner of the United States at Philadelphia,

Washington, D.C.

1<sup>st</sup> May - 1855

Sir,

Your communication in relation to the Geological Survey of Delaware is receiving the attention you request, as fully as I think you desire, and as rapidly as the Pressure of Mint duties will permit. You speak of attention being again directed to the structure of the State by Prof. F. D. Chester, my pursuits have for so long a time been foreign to Geology, that I was not aware of Prof. Chester's work, and would be much indebted to you to indicate to me, where he has published his results, and at what time, so as to facilitate my learning what has been done.

I am, Sir,

Very truly yours

J. A. C. Booth

Office of the United States at Philadelphia.
